Heinz Vol-Pak System

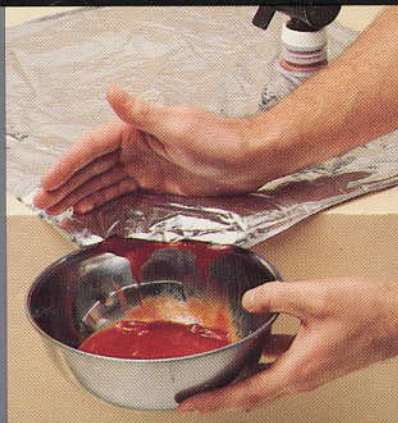

EASY DISPENSING

Heinz designed the Vol-Pak System for maximum convenience. The handy wall rack and controlled flow valve ensure fast and easy dispensing. . . with no mess, no fuss. Just remove a Vol-Pak bag from its easy-to-open carton and pull the cap off the pour spout. The

dispensing valve connects quickly and simply to the built-in spout, and it comes apart for easy cleaning. Slip the Vol-Pak into its rack for convenient and controlled dispensing—or use the pour spout and resealable closure to dispense directly from the carton.

LOWER COST

Heinz Vol-Pak is simply the most economical package ever developed. And operators gain added savings because Vol-Pak makes it easy to eliminate most of the waste that occurs with cans. Just by cutting the corner of the bag, employees can push out almost every last ounce of ketchup. And because Heinz Vol-Pak takes 20% less space than an equal amount of ketchup in #10 cans, operators gain valuable storage space.

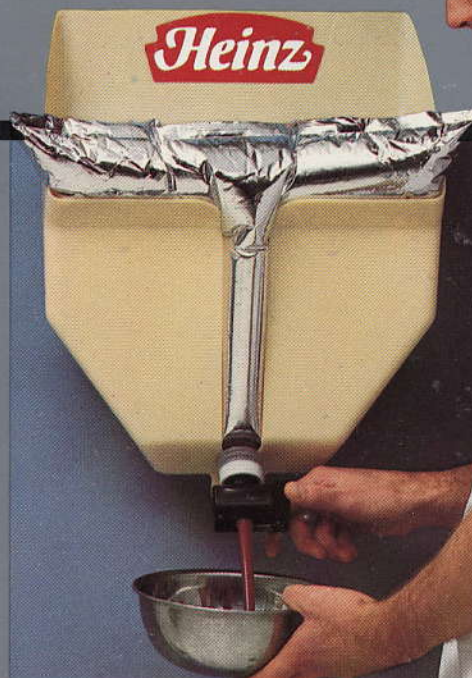

LABOR SAVING

Each Heinz Vol-Pak contains the same amount of ketchup as four #10 cans. It makes opening, cleaning, and breaking down cans old-fashioned and obsolete. Heinz Vol-Pak is an easier, faster way to dispense ketchup. Now, employees don't have to take the extra steps and time to open another can or dispose of an empty one. And the handy wall rack puts quality ketchup within easy reach.

QUALITY PACKAGING

Heinz packages its ketchup in a tough metallized bag that stands up to the roughest handling. The rugged single-ply structure, composed of three lamin-

ated layers, is easy to handle but hard to damage. With air and foreign matter sealed out, the ketchup inside a Vol-Pak maintains its quality, even without over-

night refrigeration. Quality packaging is just one more way Heinz makes sure the ketchup in every Vol-Pak lives up to its reputation.

Heinz Vol-Pak Ketchup System

If it isn't Heinz... it isn't Vol-Pak. Heinz was first to develop the innovative Vol-Pak System for the special needs of high-volume ketchup users... first to offer the labor savings, waste reduction, handling ease and cost efficiencies of this volume dispensing system... to put the most popular ketchup in the most convenient package. For front-of-the-house quality with back-of-the-house efficiencies... specify Heinz Vol-Pak.
